## The Standard Normal Distribution

The standard normal distribution

The entries of the following table are the probabilities that a standard normal random variable will take on a value lower than  $z$ ; this probability equals the area between the abscissa and the curve left of  $z$  in the above figure, that is, the shaded area.

$z$	0.00	0.01	0.02	0.03	0.04	0.05	0.06	0.07	0.08	0.09
0.00	0.5000	0.5040	0.5080	0.5120	0.5160	0.5199	0.5239	0.5279	0.5319	0.5359
0.10	0.5398	0.5438	0.5478	0.5517	0.5557	0.5596	0.5636	0.5675	0.5714	0.5753
0.20	0.5793	0.5832	0.5871	0.5910	0.5948	0.5987	0.6026	0.6064	0.6103	0.6141
